Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-2, drawn to a method of installing cable, classified in class 254, subclass 1.
- II. Claims 3-11, drawn to an apparatus for installing cable, classified in class 254, subclass 134.3R.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process can be practiced by another apparatus. For example, the process can be practiced by an apparatus having two winch wheels rather than four winch wheels.
